

Cmts A/

24(New). A method for producing the electron tube of claim 1, comprising the steps of;

forming said at least one metal film on the base;

forming said at least one additional member on said at least one linear member;
and

fixing said at least one linear member to said at least one metal film by bonding
said at least one additional member to said at least one metal film to thereby fabricating
an electron tube.
